

Computer Vision(Lab-05)

Submitted To: Muhammad Azhar

Student Name: Mubashir Ahmed Abbasi

Registration Number: 23108122

Output :

*** Upload an aerial or satellite image (preferably grayscale or color):
 Choose files | MAPPING.jpg
 MAPPING.jpg(image/jpeg) - 8077 bytes, last modified: 27/03/2026 - 100% done
 Saving MAPPING.jpg to MAPPING.jpg

Original Grayscale Image

Prewitt Edge Detection

```
plt.title('Original Grayscale Image')
plt.axis('off')
plt.subplot(1, 2, 2)
plt.imshow(edges, cmap='gray')
plt.title("Canny Edge Detection")
plt.axis('off')
plt.tight_layout()
plt.show()
```

*** Upload an image of a traffic sign or street scene:
 Choose files | BRIDGE.jpg
 BRIDGE.jpg(image/jpeg) - 8393 bytes, last modified: 27/03/2026 - 100% done
 Saving BRIDGE.jpg to BRIDGE.jpg

Original Grayscale Image

Canny Edge Detection

```
plt.subplot(1, 2, 1)
plt.imshow(img, cmap='gray')
plt.title("Original Medical Image")
plt.axis('off')
plt.subplot(1, 2, 2)
plt.imshow(edges, cmap='gray')
plt.title("Canny Edge Detection")
plt.axis('off')
plt.tight_layout()
plt.show()
```

... Upload a grayscale medical image (e.g. CT or MRI scan):

Choose files CT.jpg

CT.jpg(image/jpeg) - 7986 bytes, last modified: 27/03/2026 - 100% done

Saving CT.jpg to CT.jpg

Original Medical Image

Canny Edge Detection

```
plt.title("Original Grayscale Road Image")
plt.axis('off')
plt.subplot(1, 2, 2)
plt.imshow(edges, cmap='gray')
plt.title("Canny Edge Detection")
plt.axis('off')
plt.tight_layout()
plt.show()
```

... Upload a road image with visible lane lines:

Choose files TREES.jpg

TREES.jpg(image/jpeg) - 10043 bytes, last modified: 27/03/2026 - 100% done

Saving TREES.jpg to TREES.jpg

Original Grayscale Road Image

Canny Edge Detection
